Ivana Milovanović . . . . . 59

**DESIGN AND IMPLEMENTATION OF A CONVERSATIONAL AI SYSTEM FOR AVATARS IN VIRTUAL REALITY**
Roman Zemaník . . . . . 67

# *Editorial*

Dear readers,

each season in spring, our Faculty of Informatics arranges a contest of students´ scientific/technical works. In previous issues of our journal some of these students´works were included. This time, we proudly dedicate the whole issue 1/2026 for presentations of all participants, they took part in the convention on May 14th, 2026 at our Faculty. Alltogether seven students expressed their interest to participate, including one foreign student who completes here the Erasmus study program for visiting students.

To the next issues, we will thank you for contributions - we welcome your latest research results and technical solutions and we look forward to further collaboration.

Ing. Juraj Štefanovič, PhD.
ITA Executive editor

Final moment of the convention on May 14th, 2026 at our Faculty of Informatics.
